Tri-city Company's

Dear Tri-city Company's:

My name is John Lindquist, a Mechanical Engineering student at Washington State University, and an Eagle Scout. I am applying for an internship position. Some of my qualifications include certification in Word, SolidWorks Associate, CPR, AED, and Wilderness First Aid with knowledge in Arduino IDE and Prusa slicer.

An internship would be a perfect fit for me because I am a hard-working student and have had leadership and computer program experience. My leadership experience in scouting includes being an assistant senior patrol leader, the senior patrol leader, quartermaster, and at school in group projects. Computer programs I have experience in are SolidWorks, CorelDRAW, Prusa slicer, Word, PowerPoint, Excel, Microsoft windows, and Arduino IDE. Some of the projects I have been a part of a bridge building group. I made the design in SolidWorks and a group member built it to weight test it. Another project has been designing a house for Habitat for Humanity in a 2D drawing presenting it. Then turning the 2D drawings into 3D drawings and rendering them with textures in AutoCAD. I also love designing parts in SolidWorks to be 3D printed or laser cut.

I feel like I am a good fit for an internship at your company based on my qualifications. I would love for you to give me a call about scheduling an interview. Thank you for considering me for an internship.

Sincerely,

A handwritten signature in black ink that reads "John Lindquist". The signature is written in a cursive, flowing style with a horizontal line across the middle of the name.
